

# Barford T512 Specification Sheet

The **Barford T512** is a high-performance compact trommel designed for operators who need exceptional screening efficiency in a smaller footprint. Built with Barford's signature durability, the T512 delivers reliable throughput across a wide range of applications — from topsoil and compost to skip waste, aggregates, and light demolition materials.

---

## KEY FEATURES

### Robust Trommel Drum

- **3.5m (11'5") long x 1.5m (5') diameter** drum
- Heavy-duty mesh options for customised output sizing
- High-torque drum drive for smooth, consistent rotation

### Compact, Mobile Design

- Easily transported on a standard trailer
- Rapid setup for quick on-site operation
- Suited for tight yards, recycling depots, and small-to-medium production environments

### High-Efficiency Screening

- Impressive screening area for its size class
- Steady material flow reduces blockages
- Ideal for producing clean, uniform end products

## User-Friendly Operation

- Intuitive controls suitable for all operator levels
  - Quick access for maintenance and cleaning
  - Reliable power unit for consistent daily performance
- 

## POWER & PERFORMANCE

- **Engine:** Fuel-efficient diesel power unit
  - **Drum Length:** 3.5m (approx.)
  - **Drum Diameter:** 1.5m (approx.)
  - **Applications:** Topsoil, compost, mulch, waste fines, aggregates, sand, wood waste, and more
- 

## BENEFITS

- **High productivity** in a compact footprint
  - **Low running costs** and straightforward maintenance
  - **Durable build quality** suited for demanding environments
  - **Flexible screening** thanks to interchangeable mesh sizes
  - **Perfect entry-level trommel** for contractors, recyclers, and small processing operations
-

## TYPICAL APPLICATIONS

- Landscaping & topsoil production
  - Composting facilities
  - Skip hire & recycling centres
  - Light aggregates processing
  - Biomass & wood chip production
  - Waste fines separation
- 

## WHY CHOOSE THE BARFORD T512?

The Barford T512 offers the ideal balance of mobility, performance, and affordability. Its compact design makes it perfect for operators who need serious screening power without committing to the footprint or cost of a large trommel. With rugged construction and straightforward operation, the T512 keeps your materials moving efficiently, day after day.
